

TEDY HIDAYAT

FULL STACK WEB DEVELOPER

PROFILE

I am a **Fullstack Web Developer** with experience in building web applications using various frontend and backend technologies. I **focus on developing scalable, responsive, and user-friendly solutions with clean and reusable code.** My interest and understanding of UI/UX design further enhance the quality and usability of the products I develop.

EDUCATION

2016 - 2019

SMK NGERI 2 KOTA BEKASI

- Rekayasa Perangkat Lunak (Software Engineer) graduation 2019

SKILLS

- Laravel
- VueJs
- ReactJs
- NuxtJs
- NextJs
- NodeJs
- jQuery
- Codeigniter
- Redis
- REST API
- Tailwindcss
- Bootstrap
- Mysql
- Postgresql
- MongoDB
- GIT Versioning
- VPS/Hosting

WORKING EXPERIENCE

Fullstack Web Developer – Optimasi.ai – Remote Contract (May 2024 – Present)

- Developed responsive and pixel-perfect User Interfaces (UI) based on Figma designs, ensuring visual consistency across platforms and devices.
- Performed routine maintenance and code refactoring to improve application performance and long-term code maintainability.
- Responsible for comprehensive issue resolution, ensuring core functionality stability and a seamless user experience.

Web Developer – FTF Globalindo – Full-Time Onsite (October 2023 – June 2024)

- Developed and implemented new features, directly contributing to business needs and user requirements.
- Ensured system quality and stability through bug fixes and data integrity checks, maintaining operational reliability.
- Wrote clean, structured, and reusable code to enhance overall team development efficiency.
- Integrated the main tax application (9 Pajak) with the Regional E-Tax Service to enable data exchange.
- Actively participated in developing the Regional E-Tax Service application, supporting the digitalization of public services.

Freelance Web Developer – udang.id – Remote (August 2023 – October 2023)

- Implemented features based on Figma design guidelines, ensuring timely product delivery aligned with design standards.
- Identified and fixed bugs, significantly improving user experience quality.

Freelance Web Developer – mimin.io – Remote (March 2023 – May 2023)

- Built websites tailored to client requirements, delivering functional and personalized digital solutions.
- Applied layout structures using Laravel's Blade Template Engine, optimizing page load times and code organization.
- Ensured feature functionality with a strong focus on UX, resulting in intuitive user flows.

Backend Developer – ShipsApp – Onsite (April 2022 – March 2023)

- Designed scalable and robust backend architectures for various application modules.
- Planned and managed database design, optimizing query performance and data storage efficiency.
- Developed well-documented and efficient RESTful APIs to streamline mobile developer integrations.
- Conducted comprehensive testing, debugging, and feature fixes, minimizing production bugs.

System Analyst & Fullstack Web Developer – PT. Areta Cipta Ananta – Onsite (January 2021 – March 2022)

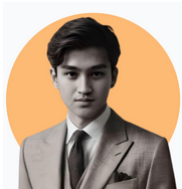

- Conducted in-depth consultations with users and analyzed requirements, producing valid technical documentation for development.
- Translated analysis into mockups, UI/UX designs, and database schemas, ensuring alignment between business expectations and technical capabilities.
- Led and supervised the development team, ensuring efficient processes and on-time project completion.
- Performed strict Quality Control (QC) to ensure applications were free of critical bugs before deployment.
- Deployed applications to VPS servers, ensuring high system availability and uptime.

IT Support – PT. Maggiolini Indonesia – Onsite (November 2019 – December 2020)

- Designed and managed the company's internet network system, improving connection stability and reliability.
- Conducted maintenance and troubleshooting for hardware to ensure smooth employee operations.
- Served as Mikrotik Administrator and managed the network infrastructure comprehensively.
- Developed the company profile website, strengthening the company's digital presence in the market.

PORTFOLIO

| YEAR | PROJECT NAME | DESCRIPTION |
|------|--|--|
| 2025 | Bumidaya Bumidaya Working Management System | Developed a web application to support internal team performance and coordination, as well as to manage submission data and job-related information. (Laravel, MySQL, JS, ReactJs, Inertia) |
| | E-Pantau PPSU GU | A web-based application designed to assist in monitoring activities and submitting work reports for Public Facilities and Infrastructure Officers (PPSU) in the Grogol Utara area. The app enables more efficient, transparent, and well-documented work coordination. (Laravel, MySQL, JS, VueJs, Inertia, Leaflet Map) |
| 2024 | DERMAGISTRY (Web App) | Developed a web application to support young doctors in recording patient health surveys. (Laravel, MySQL, JS) |
| | E-LAYANAN PAJAK DAERAH | Developed an application to facilitate the regional tax payment process (PT FTF Globalindo). (Codeigniter 3, Mysql, Bootstrap) |
| | FICTRO (Web App) | "Built a Health Human Resources Training website." (Laravel 10, MySQL, JS, TailwindCSS, Bootstrap) |
| 2023 | PORTFOLIO TEDHIYAT.ME | Created a personal portfolio website with a dynamic CMS that allows content updates without modifying the code. (Laravel 10, MySQL, JS, TailwindCSS) |
| | RAS MANAGEMENT | Developed new features for a shrimp farm management web application. (Laravel 8, PostgreSQL, JS, Docker) |
| | KATALOG PRODUK KONTAINER | Developed a product catalog website for container sales and rentals. (Laravel 10, MySQL, jQuery) |
| | YOGAFIT (Web App) | Developed a web application for member registration, membership management, and yoga class booking. (Laravel 10, MySQL, jQuery) |
| | E-KEHADIRAN (Web & Mobile) | Developed an employee monitoring and attendance tracking application. (Laravel 8, MySQL, jQuery, Bootstrap, Flutter) |
| | E-WORKSHEET & E-LOCALSTORAGE | Created an internal application for monitoring project lists and sharing local data among employees. (Laravel 8, MySQL) |
| 2022 | SHIPSAPP (Web App) | Developed a simulation website for Shipsapp Hub. |
| | COMPRO YAMA LOGISTIK | Developed the company profile website for PT. Yama Logistik. (Laravel 8, MySQL) |
| 2021 | ATONREP (Web App) | Developed a data collection and monitoring application for Navigational Aids Equipment. (NodeJS, Express.js, Laravel 8, PostgreSQL, TailwindCSS) |
| | MARLENS (Web App) | Developed an application that displays real-time vessel data from AIS Receiver onto a map. (NodeJS, Python, Express.js, Laravel 8, PostgreSQL) |
| | INSAF / SIMOL / MASDEX / SIMLOG | Developed an application for vessel flow management, PNPB payment, news data exchange, and navigation logistics monitoring. (NodeJS, Express.js, Laravel 8, PostgreSQL, TailwindCSS) |
| | COMPRO PEB | Developed the company profile website for PT. Pelayanan Energi Batam. (Laravel 8, MySQL) |
| | MOPEK (Web App) | Developed an asset maintenance monitoring application for the Dumai Navigation District. (CodeIgniter 3, MySQL) |
| 2020 | COMPRO ALUMODA | Developed a container sales website and company profile. (CodeIgniter 3, MySQL) |
| 2019 | COMPRO MAGGIOLLINI / COMPRO ACM | Developed catalog and company profile websites for PT. Maggiollini Indonesia and PT. Adi Cipta Makmur. (CodeIgniter 3, MySQL) |

TEDY HIDAYAT

FULL STACK WEB DEVELOPER

PROFIL

Saya adalah seorang **Fullstack Web Developer** dengan pengalaman dalam membangun aplikasi web menggunakan berbagai teknologi frontend dan backend. Saya berfokus pada pengembangan solusi yang **Skalabel, Responsif, dan Ramah Pengguna (User-friendly)**, dengan kualitas kode yang bersih dan reusable. Minat dan pemahaman saya dalam UI/UX Design turut memperkaya hasil akhir produk yang saya kembangkan.

PENDIDIKAN

2016 - 2019

SMK NGERI 2 KOTA BEKASI

- Rekayasa Perangkat Lunak (Software Engineer) lulusan tahun 2019

KEAHLIAN

- Laravel
- VueJs
- ReactJs
- NuxtJs
- NextJs
- NodeJs
- jQuery
- Codeigniter
- Redis
- REST API
- Tailwindcss
- Bootstrap
- Mysql
- Postgresql
- MongoDB
- GIT Versioning
- VPS/Hosting

PENGALAMAN KERJA

Fullstack web Developer - Optimasi.ai - Kontrak Remote (Mei 2024 - Sekarang)

- Mengembangkan User Interface (UI) yang responsif dan akurat mengikuti desain Figma, memastikan konsistensi visual di berbagai platform dan perangkat.
- Melakukan pemeliharaan rutin dan refactoring kode, meningkatkan kinerja aplikasi dan pemeliharaan kode jangka panjang.
- Bertanggung jawab untuk penyelesaian masalah yang komprehensif, memastikan stabilitas fungsi inti dan pengalaman pengguna yang lancar.

Web Developer - FTF Globalindo - Penuh Waktu Onsite (Oktober 2023 - Juni 2024)

- Mengembangkan dan mengimplementasikan fitur baru, berkontribusi langsung pada kebutuhan bisnis dan permintaan pengguna.
- Memastikan kualitas dan stabilitas sistem melalui perbaikan bug dan pengecekan integritas data, menjaga keandalan operasional.
- Membuat kode yang bersih, terstruktur, dan dapat digunakan kembali, meningkatkan efisiensi pengembangan tim secara keseluruhan.
- Membuat konektivitas antara aplikasi induk (9 pajak) dengan E-Layanan Pajak daerah agar bisa saling bertukar data.
- Berpartisipasi aktif dalam pengembangan aplikasi E-Layanan Pajak Daerah, mendukung digitalisasi proses layanan publik.

Freelance Web Developer - udang.id - Remote (Agustus 2023 - Oktober 2023)

- Mengimplementasikan fitur berdasarkan panduan desain Figma, memastikan peluncuran produk tepat waktu sesuai standar desain.
- Memecahkan dan memperbaiki bug, secara signifikan meningkatkan kualitas pengalaman pengguna.

Freelance Web Developer - mimin.io - Remote (Maret 2023 - Mei 2023)

- Membangun situs web sesuai kebutuhan pengguna, memberikan solusi digital yang fungsional dan personal.
- Menerapkan layouting menggunakan Blade Template Engine Laravel, mengoptimalkan waktu muat halaman dan struktur kode.
- Memastikan fungsi fitur dengan fokus pada UX, menghasilkan alur pengguna yang intuitif.

Backend Developer - ShipsApp - Onsite (April 2022 - Maret 2023)

- Merancang struktur backend yang skalabel dan kuat untuk berbagai modul aplikasi.
- Merencanakan dan mengelola desain database, mengoptimalkan kinerja query dan efisiensi penyimpanan data.
- Membuat API RESTful yang terdokumentasi dengan baik dan efisien, mempercepat integrasi untuk pengembang mobile.
- Melakukan pengujian komprehensif, debugging, dan perbaikan fitur, meminimalkan bug di lingkungan produksi.

System Analyst & Fullstack Web Developer - PT. Areta Cipta Ananta - Onsite (Januari 2021 - Maret 2022)

- Melakukan konsultasi mendalam dengan pengguna dan menganalisis kebutuhan, menghasilkan dokumen teknis yang valid sebagai dasar pengembangan.
- Menerjemahkan analisis menjadi mockup, desain UI/UX, dan desain database, memastikan keselarasan antara ekspektasi bisnis dan kemampuan teknis.
- Memimpin dan mengawasi tim pengembangan, memastikan proses pengembangan yang efisien dan penyelesaian proyek tepat waktu.
- Melakukan Quality Control (QC) yang ketat, memastikan aplikasi bebas dari bug kritis sebelum deployment.
- Melakukan deployment ke server VPS, memastikan ketersediaan dan uptime sistem yang tinggi.

IT Support - PT Maggiolini Indonesia - Onsite (November 2019 - Desember 2020)

- Merancang dan mengelola sistem jaringan internet, berhasil meningkatkan stabilitas dan keandalan koneksi.
- Melakukan pemeliharaan dan pemecahan masalah pada perangkat keras, memastikan operasi karyawan berjalan lancar.
- Bertindak sebagai Administrator Mikrotik dan mengelola jaringan secara komprehensif.
- Mengembangkan situs web profil perusahaan, memperkuat kehadiran digital perusahaan di pasar.

DAFTAR PORTOFOLIO

| Tahun | Nama Proyek | Deskripsi Singkat & Teknologi Utama |
|-------|---|--|
| 2025 | Bumidaya Bumidaya Working Management System | Membangun aplikasi <i>web</i> untuk mendukung kinerja dan koordinasi dalam tim internal serta untuk pendataan pengajuan dan informasi terkait pekerjaan. (Laravel, MySQL, JS, ReactJs, Inertia) |
| | E-Pantau PPSU GU | Aplikasi berbasis web yang dirancang untuk membantu proses monitoring kegiatan dan pengiriman laporan pekerjaan bagi Petugas Prasarana dan Sarana Umum (PPSU) di lingkungan Grogol Utara . Aplikasi ini memungkinkan koordinasi kerja yang lebih efisien, transparan, dan terdokumentasi dengan baik. (Laravel, MySQL, JS, VueJs, Inertia, Leaflet Map) |
| 2024 | DERMAGISTRY (Web App) | Membangun aplikasi <i>web</i> untuk mendukung kinerja dokter muda dalam pencatatan <i>survey</i> kesehatan pasien. (Laravel, MySQL, JS) |
| | E-LAYANAN PAJAK DAERAH | Pengembangan aplikasi untuk mengakomodir proses pembayaran pajak daerah (PT FTF Globalindo). |
| | FICTRO (Web App) | Membangun <i>website</i> pelatihan SDM Kesehatan. (Laravel 10, MySQL, JS, Tailwindcss, Bootstrap, Xendit Payment Gateway, Xendit Payment Gateway) |
| 2023 | PORTFOLIO TEDHIYAT.ME | Membangun <i>website portfolio</i> pribadi dengan CMS dinamis tanpa merubah kode. (Laravel 10, MySQL, JS, Tailwindcss) |
| | RAS MANAGEMENT | Pengembangan fitur <i>web app</i> manajemen tambang udang. (Laravel 8, PostgreSQL, JS, Docker) |
| | KATALOG PRODUK KONTAINER | <i>Website</i> katalog produk kontainer untuk dijual/disewakan. (Laravel 10, MySQL, jQuery) |
| | YOGAFIT (Web App) | Aplikasi pendaftaran anggota, <i>membership</i> , dan <i>booking</i> kelas Yoga. (Laravel 10, MySQL, jQuery) |
| | E-KEHADIRAN (Web & Mobile) | Aplikasi <i>monitoring</i> dan presensi karyawan. (Laravel 8, MySQL, jQuery, Bootstrap, Flutter) |
| | E-WORKSHEET & E-LOCALSTORAGE | Aplikasi internal untuk <i>monitoring</i> daftar proyek dan <i>sharing</i> data lokal antar karyawan. (Laravel 8, MySQL) |
| 2022 | SHIPSAPP (Web App) | Proyek <i>website</i> simulasi <i>hub</i> Shipsapp. |
| | COMPRO YAMA LOGISTIK | <i>Website Company Profile</i> PT. Yama Logistik. (Laravel 8, MySQL) |
| 2021 | ATONREP (Web App) | Aplikasi pendataan dan <i>monitoring</i> Sarana Bantu Navigasi Pelayaran. (NodeJS, Express.Js, Laravel 8, PostgreSQL, Tailwindcss) |
| | MARLENS (Web App) | Aplikasi menampilkan data kapal secara <i>realtime</i> dari AIS Receiver ke dalam peta. (NodeJS, Python, Express.Js, Laravel 8, PostgreSQL) |
| | INSAF / SIMOL / MASDEX / SIMLOG | Aplikasi untuk manajemen alur kapal, pembayaran PNBPN, pertukaran data berita, dan <i>monitoring</i> logistik navigasi. (NodeJS, Express.Js, Laravel 8, PostgreSQL, Tailwindcss) |
| | COMPRO PEB | <i>Website Company Profile</i> PT. Pelayanan Energi Batam. (Laravel 8, MySQL) |
| | MOPEK (Web App) | Aplikasi <i>monitoring</i> pemeliharaan aset di distrik navigasi dumai. (CodeIgniter 3, MySQL) |
| 2020 | COMPRO ALUMODA | <i>Website</i> media penjualan kontainer dan <i>Company Profile</i> . (CodeIgniter 3, MySQL) |
| 2019 | COMPRO MAGGIOLLINI / COMPRO ACM | <i>Website</i> katalog/ <i>Company Profile</i> untuk PT. Maggiollini Indonesia dan PT Adi Cipta Makmur. (CodeIgniter 3, MySQL) |
